Technical Data Sheet

Solid-State Wideband CW Power Amplifier, 2-6 GHz, 100 W WB26G100-V1

POAM's WB26G100-V1 is a rugged, standalone 100 W wideband GaN RF power amplifier designed for jamming and field-deployed transmitter applications. Operating from 2 to 6 GHz, the WB26G100-V1 delivers up to 50 dB of gain with under rated operating conditions. The amplifier is powered from a single 36 VDC supply and is based on gallium-nitride-on-silicon-carbide (GaN-on-SiC) technology to support wide instantaneous bandwidth, and high-power density.

The WB26G100-V1 is engineered as a compact, lightweight unit with an integrated thermal management structure to support reliable high-power operation. It is built to military-grade standards and housed in a weatherproof enclosure rated to IP67 for demanding outdoor and mobile environments. Both RF input and output ports are fully matched to 50 Ω, enabling straightforward system integration.
